

Aidan F. Schmelzle

EDUCATION

University of Kansas – School of Engineering

Master of Science – Computer Science

Bachelor of Science – Computer Science

August 2018 – December 2025

University of Kansas – School of Architecture and Design

Emphasis – Illustration and Animation

August 2018 – May 2023

Harvard College

Non-degree seeking student studying 3D-modeling and English literature

June 2017– August 2017

University of North Alabama

Non-degree seeking student studying mathematics and natural sciences

June – July 2015, 2016

WORK EXPERIENCE

Graduate Teaching Assistant, Huebner Award Nominee

University of Kansas School of Engineering

August 2023 – August 2025

- Taught ‘EECS 210: Discrete Structures’ for 4 consecutive semesters
- Personally instructed more than 100 lab students on practical applications of lecture content
- Created over 50 rubrics and graded hundreds of written assignments, programming labs, and exams
- Hosted 2 weekly office hours in addition to 4 weekly lab hours to clarify concepts and to assess learning gaps

Data Engineering Intern & Research Assistant

‘The Care Board’ (<https://thecareboard.org>)

May 2024 – August 2024

- Gathered and analyzed 10,000+ data records to inform design of a public-facing dashboard supporting care initiatives
- Contributed to construction of centralized data warehouse with reputable sources such as IPUMS
- Developed 3 interactive data visualizations to highlight data-driven narratives

KEY PROJECTS

Master’s Project – “Genetic Algorithms as Artistic Medium for Color Images”

January 2025 – August 2025

- Implemented PyGAD genetic algorithm with 736-bit chromosomes to evolve artworks based on user preference
- Engineered chromosome and custom fitness function evaluating three design fundamentals to quantify artistic quality
- Presented findings underscoring GAs’ continued value in creative, user-guided visual computing

Senior Capstone – “Nineveh, Ashur’s Awakening” (Niehaus Award Winner)

September 2021 – May 2022

- Worked in a team of five people to program a ‘rogue-like’ video game with C# in Unity
- Placed first in class of over 140 senior CS students and selected to present to university advisory board
- Illustrated and animated original artwork, including character designs, sprite sheets, and backgrounds

INVOLVEMENT

University of Kansas – HackKU Hackathon Mentor and Judge

April 2024, 2025

University of Kansas School of Law – Law Chess Club

August 2024 – May 2025

University of Kansas – Blockchain Institute, Member

August 2022 – May 2023

University of Kansas – Women in Computing, Member

August 2018 – May 2023

SKILLS/PROFICIENCIES

- **Languages:** C++, Python, SQL, HTML, CSS, Javascript
- **Frameworks:** Unity, React
- **Design Tools:** Figma, Autodesk Maya, Blender, Adobe Photoshop
